Blair's Film

It is the only one!

doesn't disappoint the user.

Don't think, because your season's work has been an utter failure on account of the misrepresentation of certain specialty Camera manufacturers, that the whole Snap Shot Camera business is a fraud. Thousands of users of Hawkeyes with Roll Holders (Hand and Folding) and Kamarets will tell you that **Blair's Film** has uniformly given good results.

Blair's Film *is made by an entirely new and original method, and in addition to its uniformity it is safe for all seasons as it* **will not frill.**

Don't be deceived by any further attempts to sell you other than the **Blair's Film.** Let the failures of others cause you always to *insist* that your Roll Holder, Kamaret or Kodak be reloaded with **Blair's Film.** If any dealer says this can't be done, tell him *you can attend to it*, and write us or send your instrument (whatever it is) to any of our offices and we will at once reload and return.

As makers of Cameras for Amateurs and the Trade since 1879, and the largest Camera manufacturers in the world, we not only know what is wanted, but test every specialty before placing it on the market. Catalogue of our specialties, including new style of Folding Hawkeye (combining every qualification of the professional Camera with compactness), sent for stamp.

THE BLAIR CAMERA COMPANY, Manufacturers. Main Office—171 Tremont St., Boston. Branches—451-453 Broadway, New York; 918 Arch St., Philadelphia; 245-247 State St., Chicago. Factories—Boston, Pawtucket, Greenpoint and Brooklyn. **E. & H. T. ANTHONY & CO.,** New York, **Trade Agents.**

New Magic Lanterns and Stereopticons.

NOT Toys, but practical apparatus for the lecturer, teacher, scientist, amateur photographer, and entertainments generally. Have you traveled in Heathen or Christian lands? Are you interested in Art, Science, Literature—in Temperance or Church Work? Do you desire to add to your income or entertain your friends? If so, **"The Criterion" or "Parabolon"** oil, lime or electric light lanterns will gratify your tastes, and further the cause at a moderate cost. The photographs you have made or bought may be utilized.

Parabolon Oil Lanterns do not smoke or become overheated, and the lamps are interchangeable with lime light jets or the electric lamps. Management of lanterns easily learned. Catalogues and information free.

BRADLEY WAGONS

Cut-Under Surrey.

A glance at our illustration will make clear what is meant by a Cut-Under Surrey as distinguished from one with a straight body. In this case the body is cut out under the front seat, so that the wheel may turn under to the reach. One can readily see that a carriage of this sort may be turned around in a comparatively small space.

IN OUR CATALOGUE, which we mail free to any address, will be found illustrations and very complete descriptions of the five styles of Surreys we manufacture. As we furnish them with various tops, fenders, etc., there are really fifteen of them. Also Buggies, Phaetons, Two Wheelers, Road Carts, and the Bradley Handy and Banner Wagons.

PURE LINEN
HANDKERCHIEFS.

Ours is a business devoted almost exclusively to linen goods, and we make handkerchiefs a special feature of this special stock. The holiday assortment of these, to which we now invite attention, has been selected with much care from many sources, and represents the work of many minds as well as many hands. It is so large and varied that it would be impossible here to describe it, but we believe we may safely say there is nothing that could be desired for man, woman or child in this line which it does not include.

Every handkerchief we sell is warranted pure linen.

Flynt Waist, or True Corset.

Pat. Jan. 6, 1874.
Pat. Feb. 15, 1876.

No. 1 represents a high-necked garment. No. 2 a low-necked one, which admits of being high in the back and low front. No. 3 is to illustrate our mode of adjusting the "Flynt Hose Support" each side of the hip; also, the most correct way to apply the waistbands for the drawers, under and outside petticoats and dress skirts. No. 4 shows the Flynt Extension and Nursing Waist, appreciated by mothers. No. 5, the Misses' Waist, with Hose Supports attached. No. 6. how we dress very little people. No. 7 illustrates how *the warp threads of the fabrics cross at right angles in the back*, thereby insuring in *every waist* **the most successful Shoulder Brace ever constructed.**

It is universally indorsed by eminent physicians as the most Scientific Waist or Corset known.

THE FLYNT WAIST

is the only garment manufactured where the material of which it is made is **shrunk** before cut, the only one which in its natural construction contains a

SHOULDER BRACE

which supports the bust from the shoulders, and (so essential to large girls or women) thereby overcomes the objectionable abdominal development. The Flynt Waist, fitting superbly, permits that most desirable grace of motion possible only with perfect respiration gained by freedom from compression.

For singers, actresses, teachers, or pupils of elocution or physical exercise, for equestrians or invalids, for every girl or woman, the Flynt Waist is unequaled.

Thousands of ladies, whom we have fitted by mail satisfactorily, are constantly blessing its inventor.

24 Cash Prizes.

We desire to thoroughly introduce our Sunol Bicycles throughout the United States in 1893, and in order to give them such an introduction, we realize that we must advertise liberally and well. We are willing to advertise liberally, but that it may be done well, we must have a supply of bright, original advertisements. We therefore make the following offer for the best 24 advertising ideas, first prize to be awarded to the author of the best, second prize to the author of the second best, etc.; decision to be made by three competent judges:

1st Prize.. $200. 2d Prize...$100. 3d Prize.. $50.
4th Prize . $25. 5th to 24th Prize .. $10.

We will also pay $5.00 for each idea not securing a prize that we think we can make use of. Contest closes January 15th, 1893. For particulars as to the nature of advertisements required, etc., address—

CORSETS.

We show in this department a fine line of Corsets designed expressly for our trade. Our manufacturer's line of goods is the most popular in the market. All grades are absolutely perfect, and in the higher grades unequaled by the best imported goods. We can recommend, and believe in the Corsets shown, and guarantee them unqualifiedly the best American-made Corsets in the market. In ordering Corsets always give size. Take the size from the waist, never from the bust. Deduct about two inches from waist measure for size of corset. Prices quoted are for sizes 18 to 30. Larger than 30 cost a slight advance.

WATCH DEPARTMENT.

We aim in this department, as in all others, to do business on a small profit basis, in a straightforward manner, and depend upon this method for our future success. It is a source of wonder how we can supply the goods we do at the prices quoted, but buying from the manufacturers for cash, and dealing direct with our members enables us to do this. America leads the world in the manufacture of good, reliable Watches, and the low prices have driven the inferior foreign article out of the market. Gold filled Cases are very popular, have stood the test of time, and are now used by many in preference to the solid gold. They consist of two plates of gold with a stiffened plate of composition metal between, all thoroughly welded together, forming practically one piece. They are fully guaranteed by the manufacturer. In illustrating our Watches we have shown only one design of engraving in each grade. We may be compelled in some cases to send a different design, but guarantee the quality to be the same. We will send Watches C. O. D. by express, with the privilege of examination, when one-third of the amount accompanies the order. The cheapest way to order is to send full amount, and 25 cents extra for postage and registration. We guarantee our Watches to be as represented, or they can be returned. We hold the manufacturer's guarantee on all our Watches, and can thus protect our members without extra cost to ourselves. We will be pleased to quote prices on any Watch not found in our list, and will guarantee a saving. Prices quoted are for 7-jeweled movements only. See list of movements for the different kinds. Prices quoted on movements are for the difference between 7-jeweled movement and the kind desired.

No. 1001. Silver Ore Watch, open face, with genuine American made Jeweled Movement, guaranteed; Stem Wind and Set. This Case will not tarnish, being of solid metal, and not plated; presents a fine appearance, and will give good service. Nothing better at the price.
Retail Price, $8.00; Members Price, $4.89.

No. 1001½. With 7 Jeweled Elgin or Waltham Movement:

SILVERWARE DEPARTMENT.

We are enabled to present to our members in this department the best assortment of silverware of any house in the West. We aim to supply only the best goods. We can furnish a cheaper grade but do not think it would give our members satisfaction in any way except price. If we have failed to quote any article wanted, write us and we will be pleased to quote prices promptly, and will guarantee a saving on articles ordered. If possible send us illustration of the article. The postage on a set of teaspoons is 8c., a set of forks or tablespoons is 15c. Registration fee 10c. We would advise registering all packages sent by mail. We charge 2½c. per letter for engraving in script, and 5c. for Old English. Remember, when ordering, that all articles are exactly as represented, or you can return them.

BICYCLES, TRICYCLES AND VELOCIPEDES.

In presenting the following to our members, after the most careful investigation of the merits of the various makes of bicycles, etc., we are fully convinced that, for general excellence, we have the best. The dealer with the poorest articles always has the best on paper. We guarantee all the goods shown in this department to be as represented, and that they can not be equaled at the price. Good material and workmanship are the features we cover by this guarantee. Purchasers of these goods can take them apart and examine and gauge every piece, and then they will understand why they run so smoothly and wear so well. They do not rattle and seem prematurely aged after a short period of use, as is the case with many inferior makes We do not think it would interest our members for us to publish here a lot of stereotyped claims of excellence, but ask a careful inspection of the real merits claimed, feeling assured that every purchaser will get full value in every case.

BICYCLES.

No. 9600—Gentlemen's National Safety Bicycle is a thoroughly high grade bicycle. The material used in its construction is the best and most expensive, and workmanship unexcelled. Weight, 48 pounds. Frame—While very graceful in design, also embraces the most approved scientific construction, with a view to the greatest strength and durability. Composition, imported seamless steel tubing of the best English make, with aluminum and drop-forged connections. Steel front forks with drawn ends. Wheels 30 inches, front and rear; true tangent spokes, 40 spokes in each wheel; imported steel rims, fitted with solid or cushion tires of highest grade of rubber. Ball Bearings of the best quality throughout head, wheels, pedals and crank axles, with latest improved adjustments. Especial attention is directed to the long socket ball bearing steering head, which, combined with the frame lines and point of ground contact of the wheel, gives such control that this machine can be easily and safely ridden where many others can not. The balls, as well as the shells or cases in which the balls run, are the finest made—absolutely perfect—reducing the friction in every bearing to the minimum. Sprocket Wheel—Forged steel and aluminum accurately milled, and fitted with the best English driving chains; rear adjustment. Cranks—Drop forgings; detachable; 5 to 6-inch throw. Brake—Direct plunger to front wheel. Saddles—We furnish the Garford, or Saddle shown in cut, whichever is desired. Finish—Best quality of nickel plate on black enamel. Gear—Unless especially ordered, we gear to 54 inches. When so desired, we gear to 51, 54, 57, 60 and 63 inches. With solid tires..... $110 00 $66 80
With cushioned tires..... 120 00 74 40

No. 9601—Ladies' National Safety Bicycle. The handsomest and most perfect Ladies' Bicycle yet introduced. Weight, 49 pounds. Frame—While very graceful in design, also embraces the most approved scientific construction, with a view to the greatest strength and durability. Composition, imported seamless steel tubing of the best English make, with aluminum and drop-forged connections. Steel front forks with drawn ends. Wheels—28-inches, front and rear; 36 spokes in each wheel; hollow rims, solid or cushion tires. In its construction particular attention has been directed to giving ladies ample room between the saddle and steering head, and also to bring the handles into such convenient position that the rider can sit erect and at ease, while having perfect control of the machine. Handles and seat adjustable. The chain guard is laced, as is also the space between the rear forks, thus avoiding contact of skirts and wheels. Direct Plunger Brake—Latest improved pattern. Improved foot rests, detachable. All parts same quality of material and finish as the Gents' Empire Safety described on opposite page. Best baked enamel finish; nickeled parts on copper. Gear—We gear to 50 inches unless otherwise desired. We will also gear to 47, 50, 53, 56 and 57 inches, as ordered. With solid tires $110 00 $66 80
With cushion tires..... 120 00 74 40

All of our bicycles are guaranteed to be free from defects in material and manufacture. Any part defective must be returned at the expense of the owner, and will be made good at our factory without charge, unless the imperfect part is the result of neglect or misuse.

The above does not apply to nickel-plating or enameling, as we are particular it shall be the best; the durability of this depending upon the use and care taken of same.

CLOTHING DEPARTMENT.

SPRING AND SUMMER.

We present in the following pages our new spring line of ready made clothing, which embraces a great variety of styles and grades, and we offer them at prices not obtainable elsewhere It is well understood that clothing manufacturers change many of their lines of goods each season, in order to make room for new styles It is therefore advisable to send in your order as soon after receiving samples as possible and to prevent delay in filling your order promptly, make two or more selections. If first choice is all sold the order can be filled without the delay of corresponding in regard to it.

SAMPLES—It is impossible to sample every item in this department, owing to the fact that most of the goods are not reserved, but are cut up into suits at the beginning of the season and are therefore not obtainable. We have designated the numbers that we do sample by placing the sample numbers immediately after the catalogue numbers, as . 28011, followed by (16778), etc. The numbers not marked as above are not sampled. We will furnish samples and measuring tape. Please send 4 cents postage for mailing. Order samples you want by number We can not break suits by sending coat and vest of one kind and pants of another, unless otherwise specified. We can not send coats or pants, when we quote suits only.

All previous lists of clothing are canceled. Order from our present list.

DANNER REVOLVING BOOK CASES—Continued.

No. 2511—(GHE) As illustrated, is a new Case that we have just introduced in response to many inquiries for a Case that would hold 100 to 150 volumes, to be strong and serviceable, well finished, and at the same time to be low priced.

Such a Case we now offer, believing it will meet the wants of thousands who have long wanted a Revolving Book Case. The size of the case is 14x21 inches, 52 inches high from floor to top. The shelves are all 19 inches long and 14 inches wide; the bottom shelf is 12 inches, the next two shelves above are each 10 inches, and the top shelf is 7½ inches high. The case will hold from 140 to 160 volumes of average size. The top shelf can be used for medium sized books, but is so arranged being entirely open, that it can also be used for atlases or other large volumes. Suited for all places where books are used. Made of solid oak, antique finish.

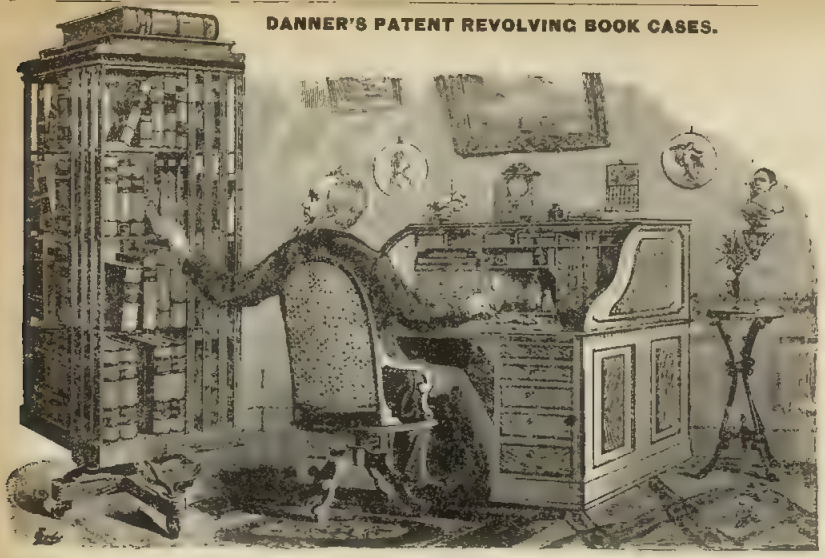
DANNER'S PATENT REVOLVING BOOK CASES.



The great popularity which the celebrated Danner Revolving Book Cases have achieved throughout the United States and in other countries, has led us to introduce new and attractive styles. Professional men have many books they want within reach when seated at a desk. One of the great advantages of this novel and unique invention is that from 75 to 200 volumes can be within easy reach, without rising from office or study chair. The shelves are so arranged that the greatest possible compactness is secured, and the space occupied by case is much less than that taken up by any other style of book case of same capacity. All Students, Attorneys, Doctors, Ministers and others who have tried these cases, are exultant in their praise. The cases are made of the best quality of well seasoned hardwood, and finished by competent workmen to correspond with the finest office or parlor furniture.

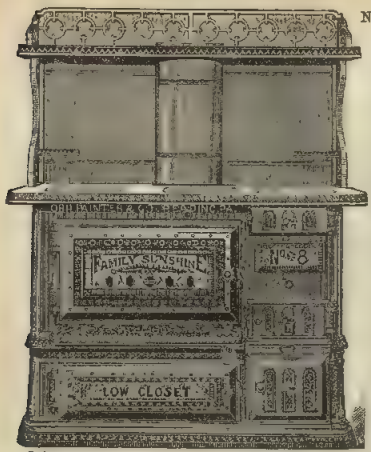
We have the best facilities for furnishing all lines of goods at low prices.

RANGES—Continued.



No. 3709—(TH) Family Sunshine Range, "Kitchener," with high shelf oven on right or left of fire. Size of oven 20 by 20 by 12½ inches, six boiler holes, cooking surface 26½ in. wide, 41 in. long.

Large superior range, with capacious ventilated oven, sheet flue, lower hot closet, large and well-shaped fire box, and the best sifter (patented arrangement) ever made. It is a complete kitchener in all its parts.

It is made in the general style of the wrought steel range, requires no bricklaying to set it, thus saving considerable outlay as compared with the brick set range. It should be set back against a wall (not against a wood or plastered partition). When set in this way, no space is left behind it for accumulation of dirt

The Family Sunshine is now made with cut tops, and with the range and hot closet mounted separately.

RATTAN AND REED FURNITURE.

We have listed a fine selection of this attractive furniture and invite our members to inspect carefully, as poor qualities are frequently sold for much higher prices than we quote for the best goods made. We guarantee all articles to be as represented, and prices to be as low as the excellent quality will permit. All goods are carefully packed and can be shipped to any part of the country safely. In ordering always give catalogue number and price, and, if possible, make first and second choice, as many of the patterns shown are so popular it is almost impossible to keep them in stock at all times. If only one pattern is desired, however, we will advise you immediately if any delay will be necessary in order to get from factory. The finishes are natural color; stained finish, which is sixteenth century, antique oak and mahogany; enameled finish is in delicate tints of green, blue pink, salmon or white. The stained and enameled finishes are very durable and lasting.

We guarantee these to be the best goods made. The prices are very low for the quality.

MOWERS.

	Ret. Price.	Mem. Price
No. 8931—National Mower is a front cut machine, having all the improvements suggested by long experience in the manufacture and sale of mowers and reapers. The frame is entirely of wrought and cast iron, is very durable, and is not affected by changes of the weather. The guards are of malleable iron, lined with steel plates. The body of Pitman is made of the toughest hickory, which has been proven to be much more durable than iron or steel, the latter being liable to crystallize and break. Our machines are made of the best materials that can be bought, great care is used in their manufacture, and they are finished in a tasteful and workmanlike manner. With each mower is furnished whiffletrees, and neck-yoke, two knives complete, two extra guards, two extra sections, one extra Pitman box, two wrenches, cold chisel, punch and oil can	$65 00	$38 75

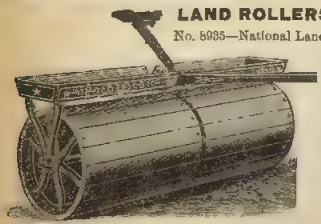
SWEEP MILLS.

No. 8534—Scientific Sweep Feed Mill grinds ear corn, new, dry or damp; shelled corn, alone or mixed with other grain for chop feed; oats, etc., and is so arranged that the interior parts of the mill revolve with the revolutions of the team and the power is applied directly to the grinding parts, thereby making the draft very light.

Price of mill complete, with one set of plates, $35 00 $23 75

Extra grinders, additional, $3 00

LAND ROLLERS.



No. 8935—National Land Roller is made in two sections. Drum, of white oak staves 2 inches thick, 4 inches wide; ends fit into grooves of heavy cast iron heads, held in position by four iron rods running lengthwise on inside of drums, drums revolve on 2-inch steel shaft running whole length of roller; box on top of drums made of white oak plank two inches thick; the large diameter of the drums and chilled bearings make it the lightest draft roller made, and in durability cannot be surpassed; it can easily be turned on its own length. Roller, 7 feet, drum, 3½ feet, weight, 900 pounds. $45 00 $23 80

We can furnish larger sizes, and will be pleased to quote prices on application.

The above have spring movements with attached key.

We have a large line of Musical Boxes, ranging in price from 55c. to $500, and will quote prices on anything desired. We list only a few, as the complete line would occupy more space than we can afford to devote to it. We cannot send them by mail as their delicate construction would be injured by rough handling. We always send by express.

No. 8900—National Improved Caboon Broadcast Seed Sower; sows all kinds of grain and grass seed. The operator carries it suspended by a strap over his shoulder and around the waist, and at a common walking gait sows from four to eight acres per hour, throwing wheat and rye about 33 feet, barley, 30 feet, Hemp, 28 feet, oats, 23 feet, Millet, clover and Hungarian, 22 feet, timothy, 18 feet. The bag and hopper will hold about 22 quarts. Weight, 5½ lbs. $5 00 $3 65

CORN AND COTTON STALK CUTTERS.

No. 8829—The National Riding Corn and Cotton Stalk Cutter, which is something entirely new and a world beater. (See 8830 for cut of double row.) The plan is different from all others, and instead of cutting by the weight of the cutter head and machine, the power comes entirely from springs, which enables us with a light cutter head to cut fence rails if necessary. The combination of lever and springs enables the operator to apply any force to the knives that may be necessary to do the work, and when raising from the ground to turn, the same spring raises the cutter head, making it the easiest cutter to handle in the world. The seat and wheels are high and the driver well up out of the dust. The wheels running into low places has no effect on this cutter, as the frame never rides the cutter head, which always has plenty of room to work, and the knives are never crushed into the ground as with all other cutters, making them do poor work and horse killers. The steel wheels have movable boxes which are bored out and fitted up as perfectly as those on a buggy. The axles are also turned up on a lathe, and protected by a hub nut (instead of a hole in the axle with a pin to keep the wheel on). When offered cheap stalk cutters, it is well for the purchaser to consider if it will not pay better to buy machines made of good material, well finished, having wheels with adjustable hubs and perfect in every respect.

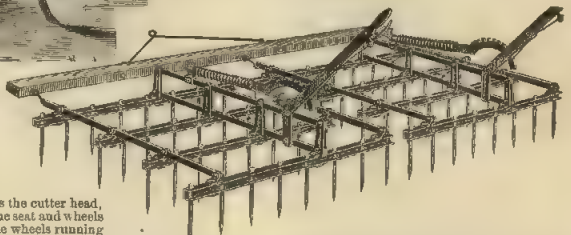
HARROWS.



No. 8832—The National Safety Spring Flexible Frame Lever Harrow has the tooth fastened to the rail by a groove in the tooth and a staple; has tooth with a groove on each side; no nuts to work loose or rust off on these. The teeth can be reversed. Made in two sections, 64 teeth. The spring gives the teeth a vibrating or dancing motion that keeps them from gathering trash—causes them to pulverize the ground more thoroughly than any other—and thoroughly protects the teeth or frame from being injured or bent by striking an obstruction. We make these harrows with or without the patent spring and with flexible or rigid frame. The spring can be changed to the ordinary style by changing a pin from the hole in front of the casting to the hole through the casting, and thus give the operator both styles of harrows in one, at but a small difference in price. The rails are made of Channel steel, very light and very strong; the teeth are fastened in with a patent device that can easily be taken out to change the teeth or reverse them, but cannot come out in ordinary use. This harrow is a great improvement over any now made, and has features, covered by patents, that no farmer will do without when once understood. The easiest harrow on the market to set up, the castings being fastened to the rails and the cross bars attached with bolts.

TYPE WRITERS AND TYPE WRITER CABINETS.

We are constantly in receipt of requests for quotations on standard type writers, such as the Remington, Caligraph, Smith-Premier, Yost, Hammond, Barlock, etc. To such of our members who wish to purchase type writers we will say, it is useless to write to us for quotations on any of the above type writers, or any other makes that are sold by agents throughout the country, as the manufacturers of these machines make one price and adhere to it strictly, in order to protect their agents It is therefore impossible for us to buy type writers that are sold in this manner for less than any of our members can, and unless you want a second hand machine, it is useless to ask us for prices. There are several concerns in our city who make a business of handling second-hand type writers, which are often as good as new for all practical purposes, and we can buy machines of this kind in first-class order, at a big reduction on the price of a new machine of the same make. We will, on request, with stamp enclosed, send samples of the work done on second hand machines that we can furnish, so that you can judge for yourself as to the class of work that they do.

We have examined a number of the low-priced type writers, and in our judgment the "Odell," description of which we give below, is the best and cheapest type writer for the price asked that is made anywhere, and we can cheerfully recommend this machine to our members, if they wish a type writer for a moderate price that will do first-class work and not get out of order easily.

TYPE WRITERS.

WHAT CONSTITUTES A PERFECT TYPE WRITER.—The essential points of a type writer are simplicity, durability and perfect working qualities. These are embodied in the Odell type writer. It has fewer parts

to get out of order, having but 41 pieces, while the high-priced machines have 820 parts, which accounts for their daily getting out of order It is more substantial in its mechanical construction than is any type writer made. While there is but one lever with which to operate all the characters on an Odell, on a high-priced instrument there is a separate and independent lever for each letter, punctuation mark and figure. The less complicated a piece of machinery is, the more smoothly it will work.

SPEED.—Experts on this machine will meet expert operators on any other machine and test the relative merits of the two in this respect. We are not afraid to place this machine in competition with any machine where speed is called in question.

MANIFOLDING.—The type being hard metal and in one solid bar, you can naturally strike harder with it than on the keys of any high-priced machine. This is why eight, ten and twelve manifolding impressions can easily be made at one writing on the Odell.

CHECK PERFORATOR ATTACHMENT.—This is a new and simple little device, attachable only to the Odell type writer, in less time than three seconds, and is the only universally recognized and absolute check protector known.

TYPE WRITER CABINETS.

We present a number of type writer cabinets, and we believe we list the best in the market.

	Ret. Price.	Mem. Price.
No. 9705—(E) Rockford Type Writer Cabinet, made of antique oak, 3 feet 8 inches high, 3 feet 8 inches wide, fitted for Remington, Densmore, Smith-Premier, Caligraph, Yost, and other machines of similar size. The manufacturer of the Rockford cabinet has carefully studied the real needs of the average office stenographer, and in this type writer cabinet has combined all that is necessary for the easy and convenient use of any of the modern type writers. The bulky cabinets filled with awkward tilting machinery, hard to open and frequently getting out of order, which have been used heretofore, have proved to be not only inconvenient and unsightly, but also a positive injury to the sensitive mechanism of the writing machines used in them. No type writing machine can long remain in good order when it is jerked up and down several times a day and hung at an angle of forty-five degrees in one of those well named "Drop Cabinets." Aside from this, these awkward cabinets take up altogether too much valuable room in many of the crowded offices, and have been found to be often a great nuisance. Very few stenographers ever need such large square desks anywhere. The inventor of this type writer cabinet has carefully avoided all of these difficulties, and has produced a cabinet that is not only a marvel of simplicity and convenience, but is also an elegant piece of furniture, fitted for either office or use in the home. An examination of this cabinet will satisfy anyone as to its decided merits	$18 00	$12 75

MUSICAL GOODS DEPARTMENT.

Our line of musical goods is very fine and complete, and we invite our members to avail themselves of the opportunity offered in this department to purchase good articles at importers' prices We have facilities for supplying anything in this line, and will answer all inquiries for articles not listed. There are many articles controlled by agents that we cannot quote prices on in the catalogue, but can supply at a saving if members will write us. We have, however, aimed to quote as good of other makes, thus avoiding the paying for a name only All goods not imported are bought direct from the factory, thus enabling us to save the profits usually charged on musical instruments. We guarantee every article offered to be as represented.

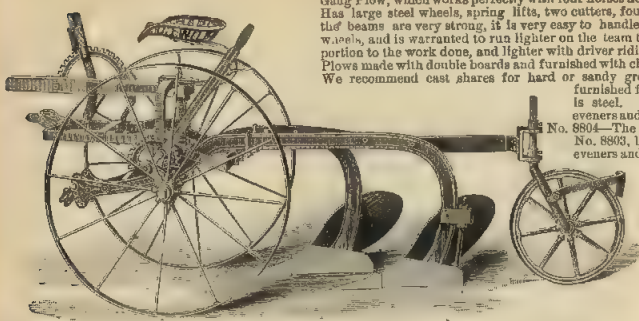
GANG PLOWS.

No. 8803—The National Gang Plow. This illustration shows our Improved National Gang Plow, which works perfectly with four horses abreast or with two ahead of two. Has large steel wheels, spring lifts, two cutters, four-horse evener and neck yoke; the beams are very strong, it is very easy to handle, is perfectly carried on three wheels, and is warranted to run lighter on the team than any walking plow, in proportion to the work done, and lighter with driver riding than any wheel plow made. Plows made with double boards and furnished with chilled cast shares when ordered. We recommend cast shares for hard or sandy ground. Breaker bottoms can be furnished for all sulkies, gangs, etc. Seat is steel. 12-inch plow, complete with eveners and cutters $75 00 $50 25

No. 8804—The National Gang Plow; same as No. 8803, but 14-inch plow, complete with eveners and cutters 80 00 53 25



No. 8805—National Wheel Gang Plow. This illustration represents the National Wheel Gang Plow with riding attachment, which works perfectly with four horses abreast or strung out—the off horse in all cases walking in the furrow. It has steel wheels, spring lift, large rolling cutters, leveling lever and perfect lifting lever, which gives it an advantage over all other wheel plows. Made either with or without riding attachment. Plows made with double boards and furnished with chilled cast shares when ordered. We recommend these shares for hard or sandy ground. 12-inch National Wheel Gang with four-horse evener, cutters, etc. $60 00 $38 95

CLOCK DEPARTMENT.

We think our Members will find this department one of the best in the Catalogue, if low prices, good quality, careful attention to their wants count for anything. We have listed only the most desirable clocks, but should they fail to cover your wants, write us, sending full and clear description of the article, and we will get it for you at a saving. We buy direct from factory and prices are very low for the fine quality. Every clock is run and thoroughly tested before being shipped, and with proper care is warranted a correct time-keeper. Should such not be the case we want to know it, as we have the manufacturers' guarantee and can protect our members' interests as well as our own. Our clocks are the latest and best designs and the finish on the cases is the finest. We pack carefully, thus preventing any damage while in transit. Always order clocks shipped by express as they are light and cannot be packed with other goods to advantage. Clocks quoted "Time" do not strike. We furnish alarms on all clocks except nickel and calendar

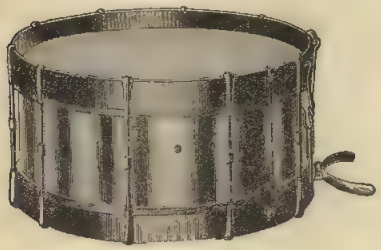
No 1752—(EHN½) Snare Drum, Prussian pattern, ebonized or imitation Rosewood finish, white metal plated trimmings, with rosewood sticks, 14-inch Maple shell, 6 inches high, 7 rods, 6 snares, 1 calfskin head	$10 50	$5 10
No. 1753—(EEN½) Same as No. 1752, 16 inch Maple shell, 8 rods, 8 snares	15 00	6 85



No. 1754—(EHH½) Snare Drum with patent rods, Maple hoops, ebonized or imitation Rosewood finish, rosewood sticks, folding knee rest, 14-inch Maple shell, 6 inches high, 7 rods, brass hooks and trimmings, 6 snares, 1 calfskin head	12 00	5 75
No. 1755—(EEE) Same description as No. 1754 with 16-in. shell, 8 rods, 8 rawhide snares, 2 calfskin heads	15 00	7 15

To those who are not already familiar with the many advantages of the "Patent Rod Drum," we would state its principal merits as consisting of a double acting rod, working from the center and tightening both heads equally at the same time by means of a right and left hand screw, thereby saving one-half the time required with the old style rods. The hooks made with a long sleeve that entirely covers the unused thread upon the rods, and being of a light and tasteful pattern, make this the smoothest and handsomest Drum in the market, as they are, without doubt, the most substantially constructed and best sounding.

The "Patent Rod" Snare-strainer, which rests on both Hoops, the folding Knee-rest, inlaid metal bands in Hoops, and many other new and novel features are embraced only in these Drums.

This cut shows **ROCK PLASTER** as it is being mixed inside the building on the same floor where it is to be applied. **ROCK PLASTER** comes conveniently put up, one hundred pounds in a bag, and is ready for use by simply mixing it with water. No sand or other substance (other than water) added at the building. This convenience allows the plaster to be distributed throughout the building in proper quantities, and to be mixed in convenient size, water-tight boxes where it is to be used.

This Means { **Time Saved,**
Material Saved,
Money Saved,
Delays Avoided,
Dirt and Filth Avoided.

Work goes on whether it rains or shines, snows or hails, and the result is a wall that is beautiful, smooth, fire-proof, water-proof, and practically indestructible. **ROCK PLASTER** is susceptible of the widest range of decoration.

Has won its way through merit.

Is endorsed by both Architects and Labor Unions.

All that we ask is investigation of its merits, and a very little will convince you that **ROCK PLASTER** is the best.

A fresh start

is given to many a career by the discovery of time-values. The earlier this is understood the better, yet it is never too late. Success may suddenly spring from a new mastery of the minutes; through possessing an accurate timekeeper, like the new, **quick-winding** Waterbury, which winds in about *five seconds*. $4 to $15.

Every jeweler keeps it in all styles for everybody. "A better timekeeper than a hundred dollar watch a friend of mine bought some months ago," says the Newburyport *Herald* man. "See it."

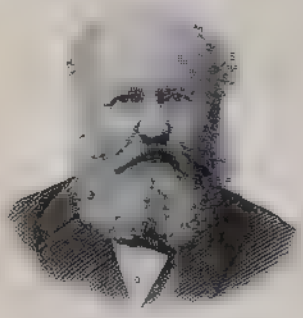
EDOUARD STRAUSS



CHARLES GOUNOD

SIR ARTHUR SULLIVAN

With Music and With Song

TO stimulate a deeper love of music in the American home, THE LADIES' HOME JOURNAL will, during 1893, enter upon the publication of what is believed by the three eminent musical judges in charge of the undertaking, to be the most notable series of original musical and vocal compositions by the most skillful composers of America and Europe, ever attempted by a magazine. The series provides, during the year, for a set of original waltzes by EDOUARD STRAUSS, a new song by CHARLES GOUNOD, the composer of "Faust," and a new ballad by SIR ARTHUR SULLIVAN, composer of "Pinafore," "Mikado," and other comic operas. In addition to these, there will be given the eight compositions for which THE LADIES' HOME JOURNAL recently offered to resident composers in America a series of prizes of $1000 for the best waltz, song, ballad, piano composition, Easter or Christmas anthem and the best four hymn-tunes.

A Musical Series
in which there will be provided
A Set of Waltzes
By Edouard Strauss
New Songs
By Charles Gounod
and
Sir Arthur Sullivan
with
Original Compositions
by
American Composers

In the furtherance of this series, it is the hope of its projectors that, through the medium of a high-grade magazine, it may be their privilege to carry into every home of refinement on the American continent a succession of compositions which shall, in every respect, represent the sweetest and tenderest melodies of music and of song. Believing that music is, to-day, the most potent influence in elevating the human mind and striking the finest chords in human nature, this series invites the attention of every parent in the land.

The compositions will be published in customary music-sheet form, bound separately from the regular JOURNAL, and will be in addition to all its literary features, some of which are briefly outlined in the three succeeding pages.

Apart from the musical series outlined on the previous page, The Ladies' Home Journal will, in its literary features, present the high standard represented in the following announcements, only a few of many:

MR. HOWELLS

Mr. William Dean Howells

A New Novel and a Series of Autobiographical Articles

Arrangements have been perfected whereby MR. WILLIAM DEAN HOWELLS will be a regular contributor to THE LADIES' HOME JOURNAL for an indefinite period. At the conclusion of his novel of American girl life, "The Coast of Bohemia," commenced in the current Christmas number, Mr. Howells will write a unique series of articles of an autobiographical character wherein he will give some of the most interesting leaves from his own life, his reading in the literature of the world, and the influences which have shaped his literary work and career. It will be a series fraught with interest to every literary person, and possessing a special degree of value to the younger school of writers

Mr. Beecher's Unprinted Words

Chapters of Unpublished Material by Henry Ward Beecher

A series of unpublished notes and writings of HENRY WARD BEECHER hitherto unknown to have existed even to his family. Under the joint editorship of MRS. BEECHER and PROF. T. J. ELLINWOOD, Mr. Beecher's private stenographer for thirty years, the material has been collated, and will appear as a series of articles. The articles deal with some of the most interesting phases of religion, marriage, politics, and woman's life.

The Well-Bred Girl in Society

By Mrs. Burton Harrison, Author of "The Anglomaniacs," etc.

This series, which was commenced in the November JOURNAL, will be continued through the early numbers of the new year. These articles will treat of the customs and duties devolving upon young girls in polite society, and will dwell particularly upon the social laws governing their intercourse with young men, visiting and call-making, and their appearance at theatre, opera and other places of amusement. This series is published with the earnest hope that it may aid girls in the smaller as in the larger cities of the country, to be in all things representative of what is best and loveliest in American womanhood.

My Father as I Recall Him

By the Eldest Daughter of Charles Dickens

In this charming series of home glimpses of DICKENS, so successfully begun in the November JOURNAL by the novelist's daughter, MISS MAMIE DICKENS, the most interesting chapters will be printed during the next year. We shall see DICKENS in the most attractive manner, getting glimpses of him in the remaining papers of

How He Wrote His Books — **When at His Desk**
His Love of Birds and Animals — **His Last Days and Death**

Are Society Women Insincere?

By the Rev. Morgan Dix, D.D., LL.D.

This vigorous article by the distinguished rector of Trinity Church, New York City, is one of a notable series of articles on social and religious themes by great pastors during 1893, the other papers being:

The Life of a Sister of Charity — **By His Eminence, Cardinal Gibbons**
Why I Am Never Ill — **By Rev. T. DeWitt Talmage, D.D.**
The Social Side of the Church, and Are Women More Religious than Men? — **By Rev. John R. Paxton, D. D.**

REV. MORGAN DIX, D. D.

Art in Outer Adornment

DURING the year, each number of THE LADIES' HOME JOURNAL will have its separate cover-design, specially designed for it. This series of artistic covers, now engaging the skill of twenty of the leading artists of America and Europe, will, it is firmly believed, form the most notable succession of artistic cover-designs which have ever formed the outer adornment of any American magazine. The design shown below is a reproduction of the first cover in a series of twelve, and ornaments the current Christmas issue.

THE COUNTESS OF ABERDEEN

How I Keep My Servants

By the Countess of Aberdeen

LADY ABERDEEN is regarded in England as being the only woman who, with a retinue of eighty servants in her household, has come closest to a solution of the servant-girl problem, and in this article she will describe, for the benefit of American housewives, her method of treating her domestic help.

My First Years as an Actress

Two Articles by Madame Adelaide Ristori

The great Italian tragedienne traces in two articles the different steps in her brilliant career, telling in the first article

"How I Became an Actress"

sketching her first appearance before the public and her feelings on that occasion. In the second article she will describe

"The Methods of My Art"

showing something of the "inside" struggles and methods necessary to a substantial success on the stage.

"Under Which Name?"

The question is often asked: Shall a married woman be addressed in letters by her husband's name, or shall she retain her baptismal name? In a notable article this query will be answered by many eminent women, including:

Mrs. Van Rensselaer Cruger	**Mrs. Burton Harrison**	**Mrs. Rebecca Harding Davis**
Mrs. Henry Ward Beecher	**Mrs. Ella Wheeler Wilcox**	**Mrs. Harriet Prescott Spofford**
Mrs. Admiral Dahlgren	**Mrs. Lew Wallace**	**Mrs. Amelia E. Barr**

The Study of the Voice

By Christine Nilsson

A careful and explicit series of suggestions and directions for girls who are anxious to sing, in connection with which will be printed a beautifully illustrated article on Madame Nilsson's present palatial home in Paris, prepared under her personal supervision.

Through Literary-Land

By Mrs. A. D. T. Whitney

A delightful series, in which Mrs. Whitney will travel with girls through the world of books and authors, telling them of her own reading and literary experiences, pointing out to them the brightest books, the people who live in them, and the authors who write them.

How Dumas Wrote "Camille"

As Told by Dumas to Lucy H. Hooper

The true story will here be given for the first time in print of how Alexander Dumas conceived "Camille," how the story suggested itself, was written, and a description of the personality of MARIE DUPLESSIS, the original of "The Camellia Lady."

This article will form one of an interesting group of literary articles, in which will also be presented:

My Father's Literary Methods	**By Rose Hawthorne Lathrop**
On Reading in Bed	**By Eugene Field**
Religious Beliefs of Authors	**By John Habberton**
The Wife of a Literary Man	**By Mrs. Bayard Taylor**
